Level I county 4 records

Guardianship (check appropriate box)

Level I county 4 records

SAIH (check appropriate box)

Level I county 4 records

MAC (check appropriate box)

Level I county 3 claims per code

Overall Impressions/Recommendations:

Rutherford County had a very strong monitoring for this state fiscal year. Monitoring was completed in the document management system, Traverse. Lori (SWS) and her staff had all records and

documents accounted for in Traverse. Rutherford Adult Services is new to Traverse; however, their taxonomy and organization of their records is very easy to navigate. There were no issues accessing case records and documents.

All MAC claims had the correct documentation and were opened/noted appropriately on the 5027.

Guardianship case records contained all legal documents, bond forms and status reports. Lori and her staff had very well documented monthly contacts with their persons under guardianship. The guardianship case record was kept separate from the other cases associated with these clients, if there were any.

SAIH timeframes were met in all the records reviewed. Lori and her staff display excellent communication between Adult Services staff and Economic Services staff to ensure referral forms, attestation forms and approvals were completed timely. Assessments for SAIH cases were also very thorough and provided great information to show that the adult was eligible and met the criteria for the program.

APS Case records were very well documented. Case decisions were made within the designated timeframes and in line with policy and statute. Case staffing between the SWS and SW were also very well documented within all records reviewed. APS cases that had a substantiated case decision had proper/accurate capacity decisions and legal service authorization to enter into Planning and Mobilization Services. In cases reviewed where legal interventions were required, the correct petitions were filed, and orders obtained.

SSBG had no errors. Daysheets were coded correctly, and documentation reflected this as well.
