RUTHERFORD COUNTY BOARD OF COMMISSIONERS
RESOLUTION
APPROVING SERVICE DISTRICT BOUNDARIES

WHEREAS, the County of Rutherford (hereinafter referred to as County) has established county service districts pursuant to Article 16 of Chapter 153A of the North Carolina General Statutes for the purposes of fire protection (hereinafter referred to as County Service Districts); and

WHEREAS, these county service districts were established on the basis that would maximize the number of individual tracts of real property located within Rutherford County that would be located within six (6) miles of an established fire department; and

WHEREAS, in order to implement this purpose, each individual tract of real property was placed within the six-mile radius of the nearest said fire department as best as could be determined using tax maps, aerial photographs, and other methods by County staff; and

WHEREAS, certain individual tracts of real property are not placed in the most efficient or correct county service district due to such factors as best and safest access being through roads better served by a different fire department than serving their current county service district, or by simple error or inadvertence; and

WHEREAS, at the establishment of these county service districts for fire protection purposes, certain individual tracts of real property were not able to be placed within the six-mile radius of any fire department due to their location but are now able to be placed within such a six-mile radius due to new fire substations being established, new routes for such servicing being created, and/or by correction of simple error or inadvertence; and

WHEREAS, it is the desire of the County: to account for more efficient fire protection service for certain properties after better assessment of road access; to correct any errors; to account for the opening of the new fire substation in the most efficient and beneficial manner to the public in relation to the county service districts; and to include tracts subsequently entering the six-mile radius; each to be accomplished by changing the boundaries of adjoining county service districts in such a manner as to ensure that each such tract is actually served by the appropriate fire department; and

WHEREAS, each of the adjoining service districts affected hereby were established for substantially similar purposes with each other, and a report was prepared and available to the public in the office of the clerk to the board at least two weeks prior to the public hearing, which report included the appropriate information required by N.C. Gen. Stat. §153A-304.3(b); and

WHEREAS, notice of the public hearing for the changing of such county service districts for fire protection purposes has been provided by publication of notice of hearing at least once not less than one week before the date of the hearing and that such public hearing has been conducted; and
